Thanks, Mike. I understand about not needing EPA input. However, the ftp site to download would still be appreciated. It'll just be easier for our electronic recordkeeping. Thanks!

Eva

Hi Eva,

I will remind Arcadis to follow the new submittal procedures. Regarding the particular report you are referring to, that is part of an upland vapor intrusion study we are completing at both Chevron and Phillips 66 Terminal. It is supplemental to the upland HHRA that was completed in the RI before my tenure on the project. The RI was completed before DEQ had a proper VI protocol and guidance and I felt that the pathway need to be evaluated for the occupied buildings at the site. I can have them give it to you, however, DEQ is not looking for input on this report from EPA as it isn't really related to source control to river and is addressing an upland only exposure pathway. I am available to answer any questions you may have about this or any other of my Portland Harbors sites. Just let me know.

Mike

Hi Mike-

I'm finally getting around to cleaning up my cubicle of hard copy reports. I received one that was sent to Rich Muza back in June 5, 2015, "Chevron Site #354972 Sub-Slab Soil Vapor Investigation report." Would Chevron/Arcadis be able to set up an FTP site so I could download from the original? If it's not possible, I can get our contractors to pdf the hard copy I have and put it in our records, but these pdfs usually get messed up in the process. I've attached our pdf guidance. Either way, please let me know. Thanks.
